[A47]

Bundesliga 2006-7 Werder Bremen GER (10),

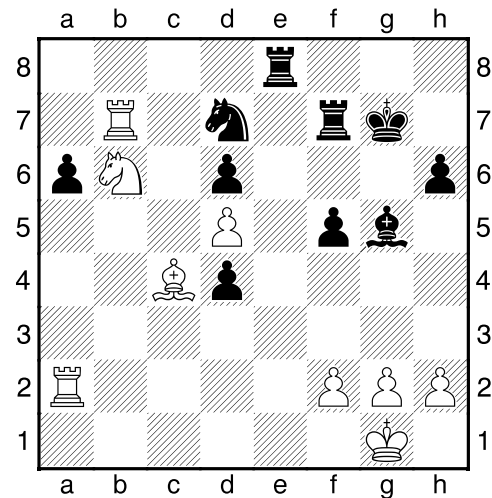

24.02.2007

[Radek Wojtaszek]

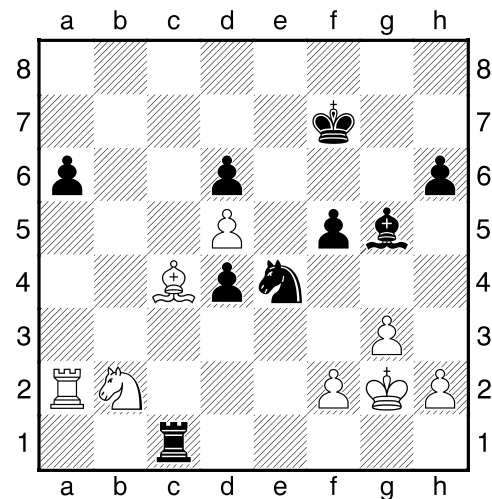

1.d4 I won three last games against Bartek, so I was in good shape, despite all that games I played with white. **1...Sf6 2.Sf3 e6 3.Lg5 c5 4.c3 b6?!** Now white has a clear advantage. More accurate was [4...h6 5.Lh4 (5.Lxf6 Dxf6 6.e4 cxd4!? 7.cxd4 Lb4+ 8.Sc3 0-0 9.a3 Lxc3+ 10.bxc3 d6= and black's position is quite solid) 5...b6] **5.e4 h6 6.Lxf6 Dxf6 7.Ld3 Lb7 8.0-0 Dd8**

After this move Bartek spent 50 minutes. It was the reason of his time-trouble. **9.Te1 Le7 10.Lc4!?** Interesting continuation. More solid was: [10.Sbd2 0-0 11.Sf1 d6 12.Sg3 Sd7 13.a3± and white has more space] **10...cxd4!** Other moves were even worse [10...0-0 11.d5± with the idea Bf1,c4 and e5; 10...d5 11.exd5 Lxd5 12.Lxd5 Dxd5 13.c4!] **11.cxd4 0-0 12.d5 Dc7 13.Dd3 a6 14.Sc3?!** This obvious move leads to the unclear play. [14.Sbd2! b5 15.Lb3 Db6 16.e5± and black has no room to breath:] **14...e5!≈ 15.Tac1 d6 16.a4 Sd7 17.b4 Dd8 18.Tc2 g6 19.Sd2 Kg7?!** I played too slowly, better was [19...Lg5 20.Sb3 f5 21.g3 f4,] **20.Sb3 Lg5 21.a5?!** [21.g3! This strong move was overlooked by both of us. 21...h5 22.h4 Lh6 23.a5+] **21...f5!** [21...b5? 22.Sxb5 (22.Lxb5?? axb5 23.Sxb5 La6-+) 22...axb5 23.Lxb5± And it looks like black has a real problem how to stop white pawns.] **22.axb6 Dxb6 23.Sa5 Dxb4 24.Tb1?!** Bartek was in time-trouble now. [24.Ta2? With the idea Rb1, but simply it doesn't work. 24...Sc5 25.Dc2 Sxe4-+; 24.Sc6! Db6 25.Sa4 Dc7 26.Lb3!≈] **24...Dxa5 25.Txb7 Tf7!?** [25...Da1+ I could force a draw, but I saw that our situation in match is not so good, so I decided to play for win 26.Tb1 Da5 27.Tb7=] **26.exf5 gxf5 27.Ta2 Dc5 28.Sa4 Dd4 29.Dxd4 exd4 30.Sb6 Te8!**

31.g3? This is the result of Bartek's time-trouble. [31.h4! This should be played 31...Te1+ 32.Kh2 Sxb6 33.Txb6 Lxh4 And black has some winning chances, but probably it should be something like a draw; 31.Txd7?! Te1+ 32.Lf1 Txd7 33.Sxd7 d3 34.f4! Lxf4 35.Kf2 d2 36.Le2 d1D 37.Lxd1 Txd1 38.Txa6±] **31...Sc5 32.Txf7+ Kxf7 33.Sa4 Te1+ 34.Kg2 Se4?** I completely overlooked winning continuation: [34...d3! 35.f4 (35.Sxc5 d2 36.Lb3 dxc5 37.h4 (37.f4? Te2+! 38.Kf3 d1D-+) 37...d1D 38.Lxd1 Txd1 39.hxg5 hxg5-+) 35...Sxa4! 36.fxg5 Sc3 37.Td2 Te2+ 38.Txe2 dxe2 39.Kf2 a5!-+] **35.Sb2?!** [35.h4! Lf6 36.Lxa6 Sc3 37.Sxc3 dxc3 38.Ld3±] **35...Tc1!**

36.Ld3 [36.h4 Le3! 37.fxe3 (37.Ld3 Lxf2 38.Lxe4 fxe4 39.Kxf2 Tc2-+) 37...Tc2+ 38.Kg1 dxe3 and probably black is winning] **36...Tc3! 37.Txa6?** The last mistake [37.f3! Sc5 38.Lxf5 and it is not easy to show winning continuation for black] **37...Lc1!-+ 38.Tb6 Lxb2 39.Lxe4 fxe4 40.Txb2** Rook ending is just matter of technique **40...d3 41.Tb1 Kf6 42.Kf1 Ke5 43.Ke1 Tc2 44.g4 Te2+ 45.Kf1 e3 46.fxe3 Txb2 47.Kg1 Tc2 48.Kf1 Ke4 0-1**
